REPORT ON THE

ADMINISTRATION OF MYSORE.

FOR THE YEAR 1901-1902.

PART I.

GENERAL SUMMARY.

His Highness the Maharaja's tour.

His Highness the Maharaja undertook a long tour in the State, leaving Mysore on the 18th November 1901 and returning to Bangalore on the 8th January 1902.

Dasara Representative Assembly.

The Nineteenth Assembly of Representative Raiyats and Merchants was held in October 1901. Out of 273 members who were returned for the year, 85 members attended and 398 subjects were discussed.

Survey Settlement.

Two Measuring establishments were organised to carry out the partial re-survey in connection with the revision settlement and were employed in Davangere and Hiriyur Taluks. The remuneration of patels and shanbhogs in the Kankanhalli Taluk was fixed under the Potgi Rules.

Inam Settlement.

266 final quit-rent registers of whole Inam villages revised on the survey valuation and 899 title-deeds for minor inams in Government villages were issued.

Legislation.

Seven Regulations were passed during the year, the more important among them being the Mysore Excise Regulation (V of 1901) and the Mysore Local Boards Regulation (II of 1902).

Police.

The village Police were provided during the year with a suitable uniform and arms. The actual strength of the Regular Police was 5,537 officers (exclusive of Probationary Assistant Superintendents and higher Officers) and men, the proportion of Police to area and population being 1 policeman to every 5·64 square miles and 1,046 inhabitants. The office of Deputy Inspector General of Police was abolished. The total number of cognizable cases reported to the Police during the year was 6,463, showing a slight decrease as compared with the figures of the previous year. There was however a large increase in the number of cases under nearly all classes of heinous crime as compared with the figures of the previous year. Of the 8,988 cases (including those pending with the Police at the end of the previous year) which came up for disposal, 2,950 ended in conviction, the percentage of convictions to cases investigated during the year being 54·3. The preventive sections of the Criminal Procedure Code were more largely put in force by the Police than during the previous year.

Criminal Justice.

During the year, 154 Courts exercised original criminal jurisdiction and 21 criminal appellate powers. The total number of original cases brought to trial was 14,046, involving 28,985 persons, of whom 8,745 were convicted. The total number of appeals was 1,182 involving 1,933 persons. The average duration of appeals in the Chief Court and in the Sessions Courts decreased considerably, while it rose appreciably in the Courts of Magistrates. The average duration of Sessions cases however rose in the Chief Court, but decreased in the Subordinate Courts. 24 cases involving 29 European British subjects were tried during the year, as against 3 cases involving 5 persons tried during the previous year. The preventive jurisdiction vested in Magistrates was more largely availed of. 140 persons were ordered to furnish security for keeping the peace or for good behaviour, 103 being imprisoned in default. The total receipts and charges of all the criminal courts in the State amounted to Rs. 81,146-14-1 and Rs. 3,94,996-8-7 respectively.

Prisons. The total Jail population fell from 11,113 to 9,654 during the year. But the daily average strength rose from 1,130·37 to 1,215·61. Eleven convicts and 2 under-trial prisoners escaped during the year and 11, including 2 who had escaped in previous years, were re-captured. There was a noticeable increase in the number of juvenile prisoners admitted during the year, 79 having been admitted against 23 in the previous year. The number of prison offences increased from 292 to 448. The number of releases however, under the Mark Rules, increased from 160 to 203 during the year. The health of the prisoners suffered somewhat during the year, the average number of sick being 20·70 against 18·19 in the previous year. The ratio of death per mille of average strength consequently rose from 11·7 to 20·56. This increase was due to the prevalence of influenza, small and chicken pox in the Bangalore Central Jail and to a few cases of plague in the Mysore Jail. The total expenditure amounted to Rs. 1,12,224 or Rs. 1,059 more than in preceding year, while the cost per head of average strength of prisoners decreased from Rs. 100-2-1 to Rs. 92-5-4. The proceeds of the sale of articles manufactured by the convicts amounted to Rs. 18,739.

Civil Justice. The number of tribunals which exercised civil jurisdiction at the beginning of the year was 26, but this number was reduced to 25 in September 1901 by the withdrawal of civil jurisdiction from the Special Magistrate, Kolar Gold Fields, and by the inclusion of the Bowringpet Taluk within the jurisdiction of the Munsiff at Kolar. Besides this, there were minor changes in the territorial jurisdiction of certain Civil Courts. The total number of suits instituted during the year was 19,757 of which the number of Small Cause suits was 8,091. The number of suits for disposal, inclusive of suits pending from the previous year, was 26,762. Of these 20,581 were disposed of leaving 6,181 pending at the close of the year. There were 2,015 first appeals for disposal during the year, 851 of which were disposed of, leaving 1,164 pending at the close of the year. The number of second appeals for disposal during the year was 487 of which 156 were disposed of, leaving 331 pending at the close of the year. The number of processes issued and the amount of fees realized were Rs. 2,03,805 and Rs. 93,378-1-0 respectively.

Registration. The total number of Sub-Registry offices at the beginning of the year was 81, as in the previous year. Of these 61 were in charge of Special Sub-Registrars and the remaining 20 were *ex-officio* offices in charge of Revenue Officers. Four special Sub-Registry offices were, during the year, opened tentatively for one year. The total number of documents registered during the year was 59,073 being a decrease of 8·5 per cent of the number in the preceding year. This decrease was due to the prevalence of plague in almost all the districts. The number of wills registered however, increased from 372 to 410. The aggregate value of documents registered was Rs. 1,34,55,230. The gross receipts of the department amounted to Rs. 1,17,461-4-11, being Rs. 7,684-11-6 less than in the previous year. The total expenditure was Rs. 74,731-0-2 against Rs. 74,334-3-9 in the previous year.

STATISTICAL RETURNS.

I. STATISTICS OF PHYSICAL, POLITICAL AND FISCAL GEOGRAPHY.

I. A. PHYSICAL GEOGRAPHY.

1. Character of the Surface.

Nature of different tracts.	Name, Area, and Physical description of each tract.	Where situated, in British or Native Territory.	Prevailing Soils, Minerals and Products.
Mountains and elevated tracts.	The Mysore country above the ghats is often called the "Table Land," a denomination very little descriptive of its appearance, as it is by no means plain or flat, but in some parts mountainous, and everywhere undulating. The Eastern Ghats form the frontier by which it is separated form the Carnatic. They constitute the exterior of the east ranges of hills, which run along the whole length of the Peninsula from Cape Comorin, stretching up to the Continent of Asia. In many parts the ascent over them into Mysore is very high and difficult, while in others it is more sloping and protracted. The country rises gradually from these ghats towards Bangalore, which is situated in the most elevated portion of the Mysore plateau, and is 3,031 feet above the sea level.		The soils, in the order of their prevailing kinds, are as follow:— 1. Read soil mixed with loam and vegetable mould. 2. Inferior red sandy soil. 3. Black cotton, free from stones. 4. Stony and gravelly soil. 5. Rich garden soil. 6. White stiff loam. 7. Block cotton, but light and stoney. 8. Soil impregnated with salt. The great rock which may be said to constitute the basis of the whole country, is a kind of sienite composed for the most part of four different ingredients, viz, quartz, felspar, hornblende and mica. The quartz has usually a dull greyish white color and veins of it from 4 to 10 inches thick often traverse the rock in different directions. The felspar varies in color from a silver white to a deep brick-red, and is the most copious constituent of the rock. The hornblende is black, very abundant, and very much given to decomposition. The mica is easily distinguished from the hornblende even when the stone is nearly in a state of disintegration. The hornblende in that state has assumed a brown-ochre-color and has lost all lustre and cohesion, while the mica retains its color, lustre and cohesion to the last, and becomes only more apparent by the progress of disintegration. This is particularly exemplified in the Mysore country, where the undulating high ground consists of sienite, decomposed into pipe clay, intermixed with micaceous shining particles and grains of quartz. From the structure of the country which is entirely primitive, no coals could be expected. Chlorite slate is found near Sira, and drawing slate in the neighbourhood of Chitaldrug. Other minerals are the following:— Clay Ironstone. Schori in quartz. Mica slate. Magnetic ironstone. Pot stone Actinolite. Ligniform asbestos. Brown spar. Common salt. Carbonate of soda. Gold. The Chief products are:— Paddy. Ragi—the principal food of the people. Bellar—a kind of small bean. Grain. Wheat. Millet. Oil-seeds. Sugar-cane. Cotton. Hemp. Tobacco. Mulberry. Coffee. Cocoanuts. Betel nuts. Potatoes.
Plains ...	The descent from Bangalore on all sides is perceptible though not rapid. On the north-west, after passing the Chitaldrug range of hills, there is a gradual fall through the broad valley which leads to the River Tungabhadra, near which is the station of Harihar, probably the lowest point in Mysore, its altitude above the sea being only 1,800 feet. To the south-west and west by Seringapatam and Hassan, there is perhaps a more marked descent until it is abruptly terminated by the western range of ghats comprising in this direction the Nilgiri and Coorg hills, and further north, the Manjarabad and Nagar ranges. A marked feature of the country is the number of isolated hills called Droogs, on the most inaccessible of which the former Pallegars or petty chiefs built forts, afterwards in many instances strengthened and improved by Hyder and Tippu and still in good preservation, but now without guns.		
Forests ...	The principal forests are found clothing the sides of the western mountains. They abound in teak, blackwood and other valuable kinds of timber. There are no forests in the Eastern Ghats. Sandalwood grows in the country bordering the hills.		
Rivers ..	The Tunga and Bhadra rise in the north-west of Mysore and uniting form the Tungabhadra, which flows northwards and eastwards till it joins the Krishna below Kurnool. The banks of Tungabhadra are too high for irrigation purposes. The Cauvery rises in Coorg and passes through and out of Mysore in a south-easterly direction, after receiving the Hemavati, the Lokapavani, the Samsha and the Arkavati from the north, and the Lakshmantirtha and the Kapani from the south. The Cauvery and its tributaries supply numerous irrigation channels and tanks. The Northern Pennar, the Palar and the Southern Pennar rise in the eastern part of Mysore, in their short course through which their waters are detained and converted into chains of tanks. They become large rivrs before they reach the sea. None of these rivers are suitable for navigation.		
Lakes ...	There are no natural lakes in Mysore; but there are nearly 20,000 artificial reservoirs, some of which are of considerable magnitude.		
Marshes ..	None of any consequence.
